The program will collect medication that the minor will self-administer when the minor is dropped off each day or dropped off for an overnight stay. The program will only collect medication from people listed on this form, who will be asked to verify their identity.

Non-FDA approved items (e.g., compounded drugs, non-prescription CBD products, herbs, dietary supplements including melatonin and probiotics, medical marijuana, minerals, vitamins), prescribed controlled substances (e.g., cough medicine with codeine, Adderall, Xanax), and medication that requires refrigeration is not accepted.

Over-the-counter or prescription medication must be in its original pharmacy/manufacturer's container. Prescription medication must be in its original container with the label with the minor's name, medication name, dosage instructions, and physician information. For programs that do not involve overnight stays, containers must only contain the dosage necessary for that day. For programs that involve overnight stays, containers must only contain the dosage necessary for the duration of the overnight stay. Medication should be provided to the program in a sealed bag.

The program will keep the medication locked until the designated time for the minor to self-administer the medication. The program will provide the minor with the sealed bag with the medication after confirming the minor's name and date of birth. The minor must self-administer the medication. The program will not assist with the administration of the medication and is not responsible for any issues that arise with the self-administration of the medication.

The program will only return medication containers to people listed on this form, who will be asked to verify their identity. The program will not return medication containers to the minor. If for any reason medication/medication containers are not picked up, the program will properly discard them within one business day.

Please provide the information below.

Medication	Dosage (can't be different from dosage instructions on the container)	Time of Self-Administration

Please provide information regarding allergies, other medications the minor is currently taking, and other pertinent medical information which may be provided to emergency medical personnel in case of a medical emergency.

I acknowledge that the above-named minor is capable of self-administering medication and knows the proper dosage that they need to take.

I understand, acknowledge, and agree to the guidelines, requirements, and procedures on this form.
